

**WORLD CLASS EXPERIENCE. WORLD CLASS SERVICE.**

## **SCRAP MANAGEMENT**

Building on Phoenix Services success in the Mill Services Sector, and applying the decades of knowledge of its senior management team, Phoenix Services has become a Global Provider of Scrap Yard Services. When it comes time to consider your next scrap yard operations plan, consider Phoenix Services.

Phoenix Services will deploy an experienced operations team to visit your job site, and consult with local management to develop a site specific operations plan that will optimize the core efficiencies of your site.

- Phoenix can take over the management of existing operations or design a greenfield site to optimize efficiencies.
- Evaluate, recommend and provide the right equipment for the job, and ensure it is modern, well maintained and operated by qualified personnel.
- Perform Scrap Yard services in both Integrated and Electric Furnace shops
- Work with a high degree of Safety, and within both Phoenix's Stringent safety requirements as well as the customers'.

### **PHOENIX SERVICES CAN:**

- Track and report daily inventory levels.
- Visually inspect each scrap delivery to ensure adherence to the customer's specifications.
- Perform a quick and accurate field chemical analysis on scrap deliveries using a handheld x-ray fluorescence device.
- Build scrap charges by specific heat lot plans, and ensure timely delivery of the charge to the melt shop or vessel.
- Provide services to prepare un-prepped purchased scrap and revert scraps for recycling back into heats.
- Provide periodic scrap related reports at the customers discretion.
- Provide ancillary equipment such as balers to convert lower quality scrap into high density prime scrap.
